

Raise your glass to better wine preservation. Sub-Zero wine storage is far more than just a wine chiller - employing a suite of technologies to protect wine from its four enemies: light, heat, humidity and vibration. Like wine with a fine meal, Sub-Zero wine storage complements your decor; thoughtful design makes these products a pleasure to own.

Two independent storage and temperature zones, each sealed and digitally controlled, allow you to simultaneously maintain perfect cellar and serving conditions in the same unit. Microprocessor control maintains even temperatures to within one degree of your presets. The ultra-violet glass panel filters out the harmful rays that can cause premature aging. The quiet compressor lets wines rest undisturbed, without the vibration that can harm delicate wines. Shelves glide out smoothly, providing access without agitation. The result? Perfect conditions and perfect wine.

Our 457mm wide integrated wine storage unit **ICBIW-18**, has no visible hinges or grilles and is designed to sit flush with adjacent cabinetry. You choose from classic stainless steel panels with either tubular or pro handles or opt for custom cabinetry to blend seamlessly with your choice of furniture. Stores up to 59 bottles.

Sub-Zero's 610mm wide integrated wine storage unit **ICBIW-24**, has no visible hinges or grilles and is designed to sit flush with adjacent cabinetry. You choose from classic stainless steel panels with either tubular or pro handles or opt for custom cabinetry to blend seamlessly with your choice of furniture. Stores up to 102 bottles.

Features of all Sub-Zero New Generation Wine Storage Include:

- New inventory system allows you to label wine racks for better organisation
- Re-designed digital touch control panel allows temperature settings to one degree of set point
- Two temperature zones from 4-18 degrees celcius
- Angled display shelf with discreet display lighting
- Full-view, UV-resistant glass door

Additional Features Include:

- Rust-proof, roller-glide shelving with cherry wood facings
- Insulated, low vibration compressor
- 90 degree door stop setting
- Optional lock
- Optional dessert wine rack holds small bottles securely
- Optional self regulating humidor with two-way humidity control.

ICBIW-30R, offers three independent temperature zones, two refrigerated drawers, storing up to 86 bottles and like all models in the range, has no visible hinges or grilles and is designed to sit flush with adjacent cabinetry. Choose from classic stainless steel panels with either tubular or pro handles or opt for custom cabinetry to blend seamlessly with your choice of furniture.

Sub-Zero's **ICBIW-30**, has no visible hinges or grilles and is designed to sit flush with adjacent cabinetry. Choose from classic stainless steel panels with either tubular or pro handles or opt for custom cabinetry to blend seamlessly with your choice of furniture. With the largest capacity, stores up to 146 bottles over two temperature zones.

About Sub-Zero and Wolf

Founded in 1945 and headquartered in Madison, Sub-Zero, Inc., is the leading manufacturer of American-made luxury refrigeration, freezers and wine storage products. Specialising in food preservation, Sub-Zero pioneered the concept of dual refrigeration and prides itself on being the first company to store frozen foods at ultra-low, “sub-zero” temperatures. In 2000, Wolf Appliance, Inc., the premier maker of ranges, ovens, cooktops and grills, was acquired by Sub-Zero; establishing the brands as corporate companions and kitchen soul mates.

Presently in its third generation of family ownership, the privately held company also operates manufacturing facilities in Fitchburg, Wisconsin and Goodyear, Arizona. Both brands are continually recognized for the highest achievements in refrigeration and cooking innovation and customer satisfaction.
